Based in Metro Manila, Philippines (UTC+8) · **Open to** remote and international roles

KEY HIGHLIGHTS

10+ years Android experience

International clients (US, Australia, Hong Kong)

Lead teams at LalaFood, Taison Digital

Sole engineer on SiteCapture (5M+ projects)

DevOps ownership at SkedGo & Outliant

400+ cities via TripGo SDK integration

TECHNICAL EXPERTISE

LANGUAGES

Primary

Kotlin, Java

Backend

Python, Node.js

Cross-Platform

Dart, C#, XML, Lua

ANDROID & MOBILE

Platform

Android SDK

Architecture

MVVM, MVP, Clean Architecture, MVC

Async & Data

Kotlin Coroutines, Flow, RxJava/RxKotlin

Networking

Retrofit, OkHttp, Ktor

Background · Testing

WorkManager, JUnit, MockK

Monitoring

Instabug

UI

Jetpack Compose, XML, Material Design

DI

Dagger Hilt, Dagger 2

Persistence

Room, SQLite (via Room)

Image · Date/Time · Maps

Glide, Joda Time, Google Maps

Firebase

Cloud Messaging, Crashlytics, Realtime DB, Remote Config

BACKEND

Databases

MySQL, PostgreSQL, MongoDB, SQLite

Integrations

Stripe, Crowdin

CROSS-PLATFORM

Frameworks

Flutter, Cordova, Ionic

Flutter stack

Riverpod, GoRouter, Hive, Firebase (Auth, Firestore), PDF/printing

DEVOPS

CI/CD

GitHub Actions, Bitrise, Jenkins

Version Control

Git

METHODOLOGIES

OOP, Software Development,
Project Management

OPEN TO

KMP, MVI

LANGUAGES

English, Filipino

EXPERIENCE

Cross-Platform Engineer

2024

Freelance

- ▶ **POS App:** Built cross-platform Point-of-Sale from scratch—Web, Android, iOS, macOS; Flutter, Riverpod, GoRouter, Hive (offline), Firebase (Auth, Firestore), PDF/printing; inventory, orders, reports, user management, multi-branch; delivered to client

Senior Android Engineer

03/2023 – Present

SkedGo (MaaS platform)

- ▶ **Development & leadership:** Lead Android development for MaaS platform; oversee requirements, timelines, team delivery; review PRs
- ▶ **Product alignment:** Sprint planning with CTO; drive Android codebase and feature parity with refined iOS experience
- ▶ **Accessibility:** Implemented and maintain dark mode, flexible text sizing across existing apps
- ▶ **Localization & automation:** Improved multi-language support via Crowdin; automated translation push/pull workflow through GitHub Actions
- ▶ **Stability & reliability:** Resolved lifecycle issues (screen restoration, user progress); fixed OOM/ANR crashes; addressed Firebase issues
- ▶ **Compliance & build:** Addressed 16KB Play policy requirement; updated deprecated dependencies that blocked build
- ▶ **DevOps:** Own CI/CD pipelines, build automation, release processes
- ▶ **SDK adoption:** TripGo SDK powers 3+ client apps (400+ cities, 4000+ transport providers globally)

Senior Android Engineer

03/2021 – 03/2023

Outliant (International digital agency)

Client: SiteCapture

- ▶ **Sole Android engineer:** End-to-end ownership of SiteCapture—field operations platform (5M+ projects, 100M+ photos) for solar, property management, construction across the US
- ▶ **Technical leadership:** Provide direction for applications; drive architecture decisions; deliver scalable, maintainable solutions
- ▶ **Codebase modernization:** Migrating Java to Kotlin; introduced Jetpack Compose, Coroutines, Hilt, Room, unit tests
- ▶ **DevOps & automation:** Integrated Jira with Bitrise—ticket status syncs with development workflow; automated builds deploy to Firebase (debug) and Play Store (prod)
- ▶ **Performance & stability:** Resolved long-standing ANRs and crashes; reduced loading times from ANR-prone to several seconds
- ▶ **Media & sync:** Migrated to CameraX; FFmpegKit for compression, decode/encode, video trimming; improved sync engine for web—mobile
- ▶ **Auth:** Integrated Auth0
- ▶ **Stakeholder collaboration:** Collaborate directly with US-based clients to gather requirements; align technical with business goals

Lead Android Engineer

07/2018 – 03/2021

LalaFood (Lalamove subsidiary — closed) · Makati, Philippines

- ▶ **Product pioneer:** Pioneer of Lalamove's Food Industry startup LalaFood; delivered working food delivery app within 6 months with entire team; led development of all apps (User, Driver, Merchant) from scratch
- ▶ **Architecture:** Introduced MVVM with Dagger/Hilt, Room, RxJava/RxKotlin, Kotlin Coroutines for scalable, maintainable codebase
- ▶ **Maps & notifications:** Google Maps, Directions, Places, Geofencing; Firebase Cloud Messaging, Crashlytics, Remote Config for live map updates and push notifications
- ▶ **Team leadership:** Led 2 Android engineers; collaborated with international engineers from Hong Kong; managed timelines, code quality; implemented CI/CD, code reviews, load/stress testing
- ▶ **Operations:** Led ongoing maintenance, bug fixes, feature releases for high-traffic production apps

Lead Mobile Engineer

11/2017 – 07/2018

Dog and Rooster Inc. (US-based, 250+ clients) · Makati, Philippines

- ▶ **Product delivery:** Pioneered, redesigned, and released multiple Android and cross-platform apps for US/global clients; end-to-end delivery using Java, React Native, Ionic, PhoneGap, Cordova across agency's client portfolio
- ▶ **SDK integration:** Designed systems with Android Mobile Vision (barcode/face detection), ZXing (scanning), Google Pay (WePay, Payment API) for payments, Firebase for analytics and crash reporting
- ▶ **Cross-functional leadership:** Android lead and standing PM; coordinated core app functionalities, requirements, deliverables with international designers, engineers, managers across time zones; ensured on-schedule delivery

Lead Mobile Engineer

04/2016 – 11/2017

Taison Digital (now Upmood) · UN, Manila, Philippines

- ▶ **Product pioneer:** Led creation of Upmood—first emotion-tracking wearable and app; built two major apps (Android & iOS) from scratch; 1K+ downloads, Health & Fitness

- ▶ **Domain expertise:** Converted research-backed emotion algorithm to Java with scientists from Hong Kong; translated physiological data (heart rate, stress, vitality) into 11 emotions at 1.5–3 min intervals
- ▶ **IoT integration:** Integrated BLE with PPG-sensor smart watch; designed pipelines for raw sensor data → real-time emotional trends
- ▶ **App features:** Built monitoring app for emotional health, mood tracking, friend/family updates, watch notifications (SMS, calls)
- ▶ **Team leadership:** Spearheaded mobile engineering; supervised 1 entry-level engineer and 1 trainee

Software Engineer

04/2015 – 04/2016

Codesignate Inc · BGC, Philippines

- ▶ **Client delivery:** Focused on development; released multiple Android apps for multiple clients; worked closely with PMs; reported team progress on sprint basis
- ▶ **Ownership:** Took over lead responsibility; worked with 1 mid-level Android engineer to deliver projects from scratch to production

EDUCATION

Bachelor of Science in Computer Science (Graduate with Honors)

Lyceum of the Philippines University · Intramuros, Manila · 2011 – 2015

PROJECTS

SkedGo / TripGo · [Google Play](#)

MaaS—TripGo, ODIN PASS, Choose How You Move. 400+ cities, 4000+ providers. TripGo SDK: 3+ client apps.

SiteCapture (Outliant) · [Google Play](#)

Field operations—photo capture, CRM integration. 10K+ downloads. Solar, property management, construction.

LalaFood Apps (Lalamove — closed)

User, Driver, Merchant ecosystem—Metro Manila's largest food delivery platform.

Upmood (Taison Digital) · [Google Play](#)

Emotion-tracking wearable app; PPG + BLE; 11 emotions. 1K+ downloads.

POS App (Freelance)

Cross-platform Point-of-Sale—Web, Android, iOS, macOS. Flutter, Riverpod, GoRouter, Hive, Firebase (Auth, Firestore), PDF/printing. Inventory, orders, reports, user management, multi-branch.

MENTORSHIP & LEADERSHIP

Ground Gurus · Coding Bootcamp Mentor (2017–2018) · Android Development

Junior Philippine Computer Society · Founder & President · Lyceum of the Philippines University
